

ASE event barrier

NEW

The unique event barrier with colour embossed marking plate

We protect life!

After the market success of the TL barrier, the ASE event barrier now follows.

Now available for you:

- Made of HD-PE, UV-stabilised
- Standard colour white
- With fixed, semi-blown connectors
- Swivelling feet for fast and easy assembly
- Hooks and eyelet connections as standard, can also be used as corner connectors
- Storage and transport rack available separately

Customising with marking plate:

- Minimum purchase volume: 100 units
- Up to 3 different colours can be selected
- The basic colour of the marking plate** already counts as one of the 3 colours
- One-time tool costs for negative plate in the injection moulding machine: **on request**
- Available **hot stamping colours** for the lettering:
■ ■ ■ ■ ■ ■ ■ (Traffic colours similar to RAL)

- The marking plates are available in the following **basic colours**: ■ ■ ■ ■ ■ ■ ■ (Traffic colours similar to RAL)
- Marking plate size: 225 mm long x 135 mm high
- **Special colours on request** (for example, other RAL colours for both the base plate and hot stamping)

Your advantages

High quality for permanent use

- UV and weather resistant as well as washable.
- High-quality plastic, chic design and extremely robust.
- Reduces the risk of theft**
- Individually marked material is of no interest to thieves.

Innovative construction site marking in your company colours

- Recognition and awareness for your company.
- You can choose the colour of the marking plate and the lettering from the colour chart.
